**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pietzka et al.

The reference teaches, especially in columns 2, 4 and 6, heating petroleum residue, devolatilizing, and coking. The temperature and pressure overlaps the claimed ranges. The reference does not teach the time of treatment, this is deemed an obvious expedient to achieve the desired degree of carbonization/coking; In re Boesch 205 USPQ 215.

Figure 2 depicts removing material from the bottom. Concerning claim 3, the back blades clean after the front blades push. In any event, having a system to remove the product is an obvious expedient for complete product recovery. Claim 4 does not require anything.

It is noted that claim 1a should actually require heating; delete 'providing ... for'. Claim 1g is met in that the product must cool at some point, such as during packaging prior to shipment. Claim 5 is obvious as an inexpensive way to perform cooling; note the coke is exposed to air in fig. 2.

Claim 6 is an obvious expedient to permit easy pumping of the product for processing.

It is noted that no IDS has yet been filed. At the least, references concerning the known techniques discussed in the specification should be provided.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
